HOW TO EVACUATE WITH ADVANCED WARNING:

MAKE an emergency plan based on the disasters that are likely to happen in your region.

BUILD an emergency kit based on the needs identified in your plan.

INCLUDE copies of essential documents in the kit and store a second set of copies online or in the cloud.

If you live in an area where a disaster is likely, PERFORM regular maintenance on your house, so there is less to do during a disaster.

MAKE SURE to have a full tank of gas, if an evacuation seems likely.

CHECK your car seats regularly so that they are safely fastened in the event of an emergency.

CONSIDER what technology to pack: personal computers, hard drives, cell phones, solar-powered cell phone charger.

HAVE any necessary pet items in a known place and ready to go in the event of an emergency.

PRACTICE your plan. Remember, preparedness is key!
